### Stewart Adams

Flooring Solution Specialist

Stewart returns to Parrys after 3 years working with another flooring company. His knowledge of Parrys products and flooring solutions makes him a great asset for the company but especially for the Parrys customers who are looking for that extra care in detail for their flooring problem.

### John Feasey

Flooring Solutions Specialist

John has now moved into a more permanent position at Belmont and his enthusiasm and relation building with customers has made him a popular sales person in the store. Alongside his extensive retail selling background, flooring has now become second nature to John and his ideas of interior design are helpful to all.

### Justin Jordan

Store Manager - Butler

Justin has returned to Parrys after a 10 year' absence. Being one of the selling staff in Parrys original City West store, he has fine-tuned his selling and management skills in an alternative retail market.

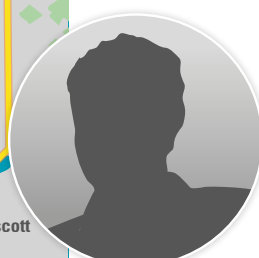

### Alain Aliphon

Store Manager - Malaga

Alain has lived the last 36 years surrounded by quality flooring.

His extensive knowledge of all flooring types has made him one of the most sought after Flooring Sales specialists in Perth.

### Derek Martin

Store Manager - Belmont

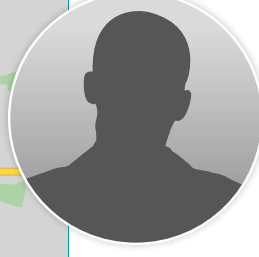

Derek comes to Parrys after extensive flooring experience in Victoria. After managing a number of stores in the Melbourne area, Derek brings his wealth of knowledge, successful sales techniques but most importantly his love of helping customers looking for their perfect floor.

### Syed Raihan

Store Manager - Myaree

Syed has been with Parrys for the past 7 years and was an integral part in setting up and running our new store in Baldivis for the past 5 years. Now the Store Manager at Myaree, Syed uses his 19+ years' flooring experience to great effect.

### Gerard Pickerd

Store Manager - Baldivis

Gerard is a renowned flooring expert with over 30 years in the industry. Living and breathing the air in the Rockingham/Baldivis area is a bonus as he understands completely customers who are looking for flooring in that region. His motto "Love Local, Live Local, Shop Local."

## 04 hybrid flooring with cutting edge technology

## 10 Laminate and engineered wood flooring: your options compared

## contents

" It is with much pleasure that we share with you the third edition of 'BELLA', Parrys exclusive magazine dedicated to flooring.

**Ian Minotti**  
General Manager

"

## welcome

We have ended Summer and survived a lockdown. Well done!

It is great to see a large number of Perth people spending their hard earned money on renovations for their homes.

We have been inundated with requests for Flooring ideas and solutions and our professional sales team have provided some great advice.

We hope this continues at Parrys five stores with three 'fine weather' months of Autumn to get some new flooring into your house.

If you are looking for hard flooring gave a serious look at Hybrid.

In this issue we are looking at two impressive products from Sunstar.

Enjoy the read!

### About the Author: Ian Minotti

*Ian is a renowned floor covering expert in product knowledge and installation. He is specialized in all types of floor coverings for many years and his knowledge in the industry is exceptional. Feel free to ask Ian any floor covering question you may have.*

### 02 Locations

At Parrys, no sale is too small, and no request too difficult.

### 03 Welcome

Autumn has begun and what a better time to renovate your house.

### 04 Hybrid flooring

Hybrid flooring uses a cutting-edge technology that combines the best features of the after-sought vinyl and laminate flooring options, creating a hard-wearing, stylish, and 100% waterproof hardwood-like flooring solution.

### 07 Carpets

Wool, Nylon or Polypropylene: your guide to carpet fibres. When it comes to flooring choices for your home, we know there are a lot of options to choose from.

### 10 Your options

One of the first questions that you need to ask yourself when it comes to choosing new flooring for your home is whether you'd like walking on hard or soft flooring?

### 12 High-traffic areas

When choosing the type of flooring you want to use, the first thing you need to determine is the amount of activity each room sees.

### 14 Vinyl flooring in the bathroom

Bathrooms are one of the first places owners look to renovate when redecorating their home. A chic, modern bathroom creates plenty of appeal for potential buyers and keeps the design aesthetic of the whole home flowing from room to room.

# Hybrid flooring

## What is hybrid flooring made of?

Hybrid flooring uses a cutting-edge technology that combines the best features of the after-sought vinyl and laminate flooring options, creating a hard-wearing, stylish, and 100% waterproof hardwood-like flooring solution. It is engineered to merge multiple layers: UV coating for high-impact resistance, a pre-adhered acoustic backing for improved underfoot comfort, and a decorative layer that mimics the look and feel of natural hardwood floors.

### Why is Hybrid Flooring so Revolutionary?

First there was vinyl, then there was laminate. Now, the new kid on the floor covering block is the aptly named 'hybrid flooring'.

Hybrid flooring is exactly what it sounds like. It is a fusion of two of the existing – and well-known – flooring options that

are currently on the market. Hybrid flooring can do what current flooring options can't, without taking away from the finished look or compromising on that all-important underfoot comfort.

Want to know more about the product that is making waves across Australia? We answer some of the most commonly asked questions about hybrid flooring below.

### What is hybrid flooring?

Hybrid flooring is a revolutionary new product that gives you the look of hardwood while combining the best attributes of laminate and vinyl floors. It has the rigidity that vinyl lacks, but more to offer than a traditional laminate. The result is a floor that is stylish, durable and fully waterproof.

### Why is hybrid flooring so technologically advanced?

Hybrid flooring is dubbed as the next generation in flooring technology. Thanks to it being 100% waterproof (not just water resistant), is the first rigid flooring product that isn't room exclusive. That means you can have hybrid flooring installed in any room in your house, including your kitchen, laundry and even your bathroom.

It is never recommended to install traditional laminate in rooms where damp might be an issue, but the waterproof hybrid flooring works a treat in those areas.

Finally, a hard-wearing, hardwood-look flooring that you can keep consistent and lay anywhere in the house!

### What makes hybrid flooring 100% waterproof?

One of the hybrid flooring layers features a limestone composite core board that gives the product the waterproof properties. The same technology feature makes hybrid flooring odour-proof and resistant to scratches and stains. These combined properties make hybrid flooring a perfect option to hold up foot traffic even from pets as well as kids.

4m WIDE – SHEET VINYL

FROM \$22.90m<sup>2</sup>

**RESILIENT FLOORING**

Quick and easy flooring cut off a 4 metre wide roll. No hassles, no fuss, perfect for heavy traffic areas. Easy maintenance and cleaning.

LUXURY VINYL PLANK

FROM \$18.90m<sup>2</sup>

**EASY DIY**

Ranges from DIY 'Peel & Stick' directly to the concrete floor to commercially glued down vinyl planks.

ASK ABOUT OUR

WOOD, TILE & GRANITE LOOK FINISHES

**FINISHES**

In both the sheet vinyl and vinyl plank ranges there is a variety of finishes. Traditionally wood look flooring is the most popular but ask about our tile and granite looks as well if that is your desire.

5.5m WIDE – AQUACLIC HYBRID

FROM \$35.90m<sup>2</sup>

**HYBRID FLOORING**

5.5mm Aquaclic Hybrid flooring is our most popular hard flooring range in Parrys.

ASK ABOUT OUR

PROFESSIONAL INSTALLATION SERVICES

**INSTALLATION SERVICES**

If you are not the handyman we offer professional installation services. Our layers have been with Parrys for many years and it is difficult to find better.

Alain from the Malaga branch has been a real pleasure to deal with and goes above & beyond to ensure the project runs smoothly.

**Toni McIndoe**  
Malaga

# SUNSTAR

## TIMBER FLOORING

### What are the features of hybrid flooring?

Hybrid flooring is a very resilient floor covering. Not only is it 100% waterproof thanks to the limestone composite core board, but it can withstand direct heat and extreme cold. Even with underfloor heating or in fluctuating temperatures, the boards expand and contract minimally. This means no lifting, cracking or buckling of your flooring as the temperature changes.

The same technology that makes the hybrid flooring waterproof also keeps it odour-proof.

Why is this important? Well, the fact that the flooring is odour-proof, combined with the non-scratch surface and stain resistance, makes it perfect for laying in homes with pets.

### How do you install hybrid flooring?

The hybrid flooring installation process is exactly the same as with laminate flooring. Using a click and lock system, the hybrid boards slide and secure into each other with ease. For an in-depth guide on the process, take a look at our guide to laying laminate flooring.

### Where can I get hybrid flooring in Perth?

Hybrid flooring is becoming increasingly popular in Perth and Australia. We have a great range of very competitively priced hybrid flooring available in our Parrys Belmont, Malaga and Baldivis warehouses.

## POSEIDON HYBRID PLANK

Applying the industry leading stone polymer stabilised base, this innovative Engineered SPC floor provides all the benefits of timber flooring including the perceived warmth and cosiness whilst not damaging trees.

The environmentally friendly flooring solution uses high quality décor film on top of the SPC core, or rigid core, to imitate the same feeling from authentic wood floors.

**Plank Size:** 180mm x 1220mm

**Thickness:** 5.5mm

**Wear Layer:** 0.30mm

**Pack Size:** 2.80m<sup>2</sup>

## MAXI-7 HYBRID PLANK

Maxi-7 Hybrid is an innovative composite flooring product capturing the natural beauty of timber as a stabilised waterproof system.

With premium ceramic coatings designed for commercial and high traffic residential uses.

- Sound reducing Pad
- 100% Water Proof
- Fast & Secure Clip System
- Superior Scratch Resistant
- Pet Proof
- Formaldehyde Free
- No acclimatisation necessary

**Plank Size:** 1830mm x 230mm

**Thickness:** 7mm

**Wear Layer:** 0.50mm

**Pack Size:** 2.10m<sup>2</sup>

# Carpets

## Wool, Nylon or Polypropylene?

### Wool, Nylon or Polypropylene: your guide to carpet fibres

When it comes to flooring choices for your home, we know there are a lot of options to choose from. If you have decided on laying carpet as your new flooring, there are still more decisions to make!

There are many types of carpet fibres available, to suit different requirements, tastes and budgets. So which one is best for you and your home? Read on to find out.

### Wool Fibres

Wool fibres are a popular choice for carpeting, because they are natural, luxurious and come in a wide range of finishes and colours. A renewable resource, wool is the preferred flooring choice for many people, due to its classic style.

### Durability and resilience

Wool fibres are extremely strong and long-lasting, giving wool carpeting excellent back-bounce properties which allows the carpet to retain its original appearance after compression. If properly looked after and maintained, wool carpet fibres offer superior durability.

### Easy cleaning

Chemical stain resistance treatments are not necessary for wool carpeting. Wool's unique fibre structure of microscopic, overlapping scales (similar to tiny roof shingles) make it durable and hard-wearing, while stopping dirt from adhering to the fibres.

Wool also does not attract lint, making vacuuming easier and when wet cleaning, the wool fibres swell and release dirt particles, to enable easy clean-up.

### Environmental benefits

Wool is a natural product, rather than being man-made and grows continuously on grazing sheep. Additionally in landfill, wool will decompose leaving no harmful residues.

### Soft to the touch

Wool's unique texture and springiness, combined with its luxurious warmth will leave you wanting to walk around barefoot all day.

### Health benefits

Wool has the unique property to be hypo-allergenic and does not promote the growth of dust mites or bacteria or give off any harmful emissions.

## Nylon Fibres

Advancements in technology and manufacturing mean that synthetic carpets have come a long way since they were first introduced. Synthetic nylon carpet can have just as many benefits as wool carpets and because of its affordability, nylon carpet is often the preferred carpet fibre for many Australian homes.

### Versatility and choice

Nylon is very versatile and can come in a wide range of colours and can be found in both cut pile and loop pile styles. The wide range of different types available means it will suit many different styles of homes.

### Durability

Nylon is constructed to be a very strong fibre and it stands up very well to abrasion, making it fantastic for high-traffic areas like hallways, the living room or kids bedrooms. It's also highly durable and has great "yarn memory" which prevents crushing of your carpet, meaning it will look fresh and new for longer.

### Soil and stain resistant

Nylon carpeting is manufactured and designed with superior stain resistance, as well as being resistant to dirt, as the fibre is better at resisting the absorption of fluids and dirt, making it perfect for high-traffic areas in your home or for commercial areas, where accidental spills may occur.

Nylon carpets are more stain resistant than other types of carpet, as nylon is water resistant meaning that most spills and accidents can be cleaned up with a quick vacuum or spot cleaning.

### Fade resistance

Nylon carpets fibres are fade resistant, making them perfectly suited for those areas that are exposed to direct sunlight, like areas near large windows. There are not many places in the home where nylon carpeting would not suit!

### Value for money

Nylon carpeting is readily available at all price points; it's a versatile fibre that can be used in cost-effective carpeting for investment of first homes, but it is also suitable for higher-end products to suit your forever home.

## Polypropylene fibres

Polypropylene, also known as Olefin, is another synthetic carpet fibre, similar to Nylon. Its wool-like appearance, practicality and low-price point makes it a very popular choice as a flooring option.

### Highly stain resistant

Polypropylene fibres are highly resistant to staining because they are hydrophobic, meaning that they do not absorb liquid. Because of this characteristic they cannot be dyed like regular carpet fibres, but instead the colour of the polypropylene carpets fibres is added to the during production.. Because of this manufacturing process, solution-dyed fibres have no open dye sites, so there is nowhere for stains to attach to.

### A practical choice

Due to their unique manufacturing process, polypropylene carpets offer excellent fade and stain resistance. The fibre dries quickly when wet and so is not prone to mould or mildew as a result of the moisture.

### Easy to clean

Polypropylene fibre carpets are very easy to clean due to their stain resistance, making them the perfect choice in rooms where the carpets may be subjected to unexpected spills, like dining rooms, children's bedrooms, and playrooms.

### Stylish and versatile

Polypropylene fibre carpets are valued in the carpeting industry for their wool-like appearance, and their finishes can range from low luster (matte) to a high sheen, giving homeowners a range of options and styles.

Great quality at an even better price

Polypropylene fibre carpets are very strong and abrasion resistant, and offer versatility at a very reasonable price point, making it a great option for first home owners, investors, or families on a budget who still want a stylish and quality product.

### Parrys' Parting words

So whether you choose wool, Nylon or Polypropylene fibres for your new carpets, you'll find a great range of products to suit and taste and budget at Parrys.

# Laminate and engineered wood flooring: your options compared

One of the first questions that you need to ask yourself when it comes to choosing new flooring for your home is whether you'd like walking on hard or soft flooring? This can depend on the function of the room, what your priorities are (i.e. comfort versus durability) and what look you are trying to achieve.

If you have decided for hard flooring, then you have even more decisions to make! There are a wide range of hard flooring options available and the most popular include **engineered timber floorboards** and **laminate planks** only mention a few.

All have different benefits and what you choose mainly depends on your preferences, needs and budget. Let's go through some of the features of each type of flooring and why they could be a suitable flooring choice for your home!

## **Laminate: easy to maintain and inexpensive**

There are so many reasons why people choose laminate flooring for their homes, but some of the main benefits of laminate flooring is how durable and long-lasting it is, it's inexpensive price point and the fact that you can get laminate flooring in a huge range of colours, patterns and styles.

**Laminate flooring** consists of layers that are adhered together in a lamination process. It has an inner core of wood and this helps to make the floor strong and durable. Instead of being glued or nailed to the subfloor, the flooring is fixed using a 'click and lock' assembly, known as a 'floating floor' system, which means that it is also easy to install yourself!

While laminate flooring may conjure up images of unfashionable patterns on sheet laminate from the 90's, today's laminate can be easily mistaken for wooden floorboards, but at a fraction of the price!

## **Engineered timber: very durable but requires maintenance**

**Engineered timber floor**, to not confused with timber flooring, is made by joining multiple layers of wood pressed together. These layers of wood are called plys. The visible top layer of an engineered timber plank is called the lamella and is generally made of hard wood such as Blackbutt, Jarrah and Spotted Gum.

Engineered timber flooring is typically more prone to scratches and scuffs than laminate and bamboo which means it needs more maintenance than other flooring types. But on the flip-side, engineered wood offers greater durability and a more realistic look as well as feel.

On average, engineered wood is comparatively more expensive than other flooring options and it comes in a range of price structures right from the bargain prices to luxury styles. The price tag of engineered timber is mainly driven by the thickness of the lamella and its unique characteristic.

Ultimately, whatever type of hard flooring you are looking for, the experts at **Parrys Carpets** can help you make the decision for what is best for you and your home.

Contact us today to see our wide range of options and for our expert advice!

## LAMINATE AND ENGINEERED WOOD COMPARED

	Pro's	Con's
<b>Laminate</b>	<ol style="list-style-type: none"> <li>1. Inexpensive</li> <li>2. Low maintenance</li> <li>3. Easy and fast to install</li> </ol>	<ol style="list-style-type: none"> <li>1. Less eco-friendly</li> <li>2. Can look cheap</li> </ol>
<b>Engineered timber</b>	<ol style="list-style-type: none"> <li>1. Tougher than laminate</li> <li>2. Wide range of colours and finishes</li> <li>3. Environmentally sustainable</li> </ol>	<ol style="list-style-type: none"> <li>1. Requires careful maintenance</li> <li>2. Vulnerable to water damage</li> <li>3. Can only be refinished 3 or 4 times</li> </ol>

New flooring is one of the best ways you can elevate and upgrade the look of your home. When choosing the type of flooring you want to use, the first thing you need to determine is the amount of activity each room sees.

Your home may see a lot of foot traffic coming through a main hallway into your living room or bedroom. It could be your kitchen or lounge spaces, or open dining area where people tend to gather. Some families have a rumpus room or plenty of rambunctious pets to contend with.

Knowing which areas in your home receive the most amount of foot traffic is important to determine the type of flooring you'll need. Exceptionally high levels of foot traffic require flooring that is sturdy, hard-wearing and will stand the test of time.

There are plenty of great options to choose from when it comes to the best type of flooring for high-traffic areas.

### Carpet

Soft and cushiony underfoot, carpet is a wonderful way of bringing warmth and sweet comfort into your home. **Carpet is relatively easy to maintain** and can provide a luxurious feel to your rooms, especially when teamed with a great underlay.

Carpet is more likely to be subjected to wear and tear over time. Over the years it may discolour in the sun, stain from use, have pulled fibres from pet claws, end up pilling (depending on the style of carpet) or develop bald spots in high-traffic areas.

To ensure you get the most out of carpet in high-traffic areas, we recommend choosing high-quality, synthetic fibres that can withstand even the toughest corridors of your home.

### Laminate flooring

One of the most robust types of flooring around, laminate is an excellent choice for high-traffic floorspaces. **Laminate flooring** is a great alternative to expensive, high-maintenance hard-wood timber, offering greater durability with the look and feel of timber.

Many people choose laminate planks for aesthetic appeal, exceptional durability and low-maintenance costs. Unlike hard-wood timber, laminate flooring does not require sanding or polishing as it contains a wear layer to protect the decorative and core layers underneath. However, once worn down or damaged, laminate planks require careful replacement.

### Vinyl flooring

A highly popular choice for high-traffic areas is **vinyl flooring**. Whether choosing vinyl sheets or planks, vinyl looks luxurious, feels incredibly comfortable and is comparable in durability, look and feel to laminate.

To reduce the chances of damaging your vinyl flooring we recommend keeping pet nails trimmed, and having mats at all outdoor entrances to the home, to ensure that outdoor matter is captured before it is walked throughout your home.

### Hybrid flooring

The best of laminate and vinyl, combined in one tough product. **Hybrid flooring** is made with cutting-edge technology, providing the look of hardwood timber flooring while being

100% waterproof, resilient to temperature changes, while being completely odour, scratch and stain resistant.

More rigid than vinyl with UV-coating for high-impact resistance, hybrid flooring

is an exceptional choice for high-traffic areas requiring the toughest of flooring solutions.

Need help choosing? Contact our friendly staff and we'll help you find the right flooring product for your needs –

whether it's a renovation or a new build, we've got all your flooring needs.

# Can you use vinyl flooring in the bathroom?

Bathrooms are one of the first places owners look to renovate when redecorating their home. A chic, modern bathroom creates plenty of appeal for potential buyers and keeps the design aesthetic of the whole home flowing from room to room.

When choosing new flooring for your bathroom or ensuite, there are plenty of smart and sophisticated options available. Instead of using traditional tiling, more people are choosing to elevate the look of their bathrooms with vinyl flooring.

## Why vinyl flooring?

Bathrooms are one of the most heavily trafficked rooms in the home. They're used every day, get exposed to all kinds of dirt and grime and liquid spills, and withstand a wide range of beauty and cleaning products.

Bathrooms need to be resilient to this kind of daily use. They need to be waterproof (to prevent costly damage), stain resistant (to reduce maintenance and replacement costs) and simple to clean (so you can get on with the more important things in life!)

When it comes to ticking all these boxes, vinyl flooring is a fantastic choice for bathroom renovations and for those building new dwellings.

## What are the benefits of vinyl flooring?

There aren't many types of flooring that can withstand the vigorous uses of a bathroom, but vinyl flooring is a solid choice. Vinyl flooring provides:

- **Moisture resistance** – bathrooms fluctuate in temperature and moisture. While timber flooring looks fantastic in the home, it can be a nightmare to deal with in wet spaces. Timber holds moisture, which can cause it to expand and warp. Vinyl flooring remains stable throughout the year, no matter how steamy or wet your bathroom gets.
- **Slip resistance** – wet floors are hazardous, which in a bathroom full of glass, metal fixtures and porcelain can be incredibly dangerous. Vinyl flooring comes in different finishes, which can reduce instances of slippage (even in wet conditions).
- **Design appeal** – vinyl flooring can give the same elegance and beauty of timber or stone flooring but at a fraction of the cost.
- **Easy installation** – vinyl flooring comes in sheets or planks, and can be installed professionally, or with care as a DIY project.
- **Budget-friendly** – bathrooms are expensive to renovate and build. Vinyl flooring is a great choice for people who want a cost-effective solution that delivers a sophisticated and visually appealing design.

## What type of flooring shall I choose?

When designing your bathroom, you'll need to decide what type of vinyl flooring would best suit your needs:

- **Traditional vinyl** – traditional vinyl is soft underfoot and makes a great alternative to hard tiles. Traditional vinyl flooring comes in your choice of sheets or planks.
- **Luxury planks** – these look similar to wooden floor boards, but are made up of different composite layers that create a hard-wearing, natural-looking surface.
- **Hybrid vinyl plank** – a durable, impact-resistant type of flooring, hybrid flooring features the look of luxury vinyl planks while having a more rigid core.

Need help choosing the right flooring for your bathroom? The friendly team at Parry's Carpets can walk you through the various styles and options available, so that you can feel confident in knowing your bathroom will look spectacular for years to come.

## KEEP YOUR VINYL FLOOR LOOKING GREAT

### New Floors

Use a Damp mop immediately. Do not scrub or wash for at least 72 hours.

### Regular Maintenance

- Sweep or vacuum regularly, to remove loose dirt, which can scratch your floor. Note: We do not recommend vacuums that have a beater bar since it can visibly damage your flooring surface. Additionally, we do not recommend electric brooms with hard plastic bottoms with no padding as use may result in discolouration and de-glossing. The use of steam mops or similar is not recommended.
- Wipe up spills as soon as possible. Never use highly abrasive scrubbing tools on any resilient floor.
- Wash your floor regularly with a neutral detergent.
- DO NOT use abrasive cleaners, or "mop and shine" products. These products may leave a dull film on your floor.

- Over time, if the shine on your floor begins to dull, you can apply a Shinekeeper Floor Finish. DO NOT use paste wax or solvent-based polishes.
- Vinyl flooring, like other types of smooth floors, can become slippery when wet. Allow time for floor to dry after washing. Immediately wipe up wet areas from spills, foreign substance, or wet feet.
- Do Not use highly alkaline 'floor strippers' to clean the floor covering. Highly alkaline solutions have the potential to damage the adhesive bonds between the planks.

## Proactive Protection for your Floor

- When moving appliances or heavy furniture it is always wise to lay a plywood panel on your floor and "walk" the item across it. This protects your floor from scuffing and tears.
- Use floor protectors under furniture to reduce indentation. As a general rule of thumb, the heavier the item, the wider the floor protector needed.
- Place a walk-off mat at outside entrances to reduce the amount of dirt brought into your home. We strongly recommend mats without a latex or rubber backing since these backings can cause permanent discolouration.
